

The MAPS Initiative

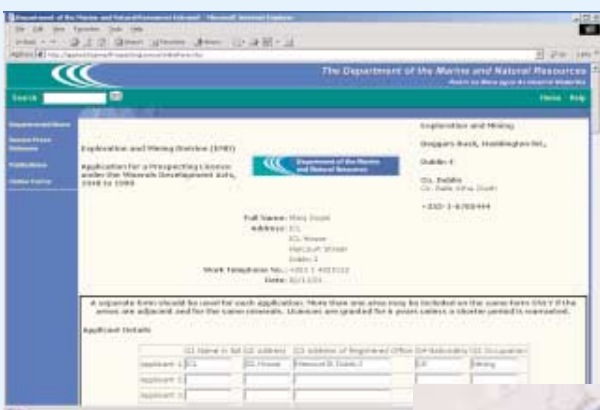

Your Exploration Gateway to Ireland

www.emd.ie

The MAPS (Minerals Administration Programme Support) Initiative is a major e-Enabled project by the Government of Ireland to enhance data availability, ease of business transactions and the regulatory service to the minerals industry.

What you will get

- **Free access to all publicly available data sets** held by the Exploration and Mining Division **on the internet with GIS functionality.** This includes the status of exploration ground, administrative history, exploration company reports, geological data, airborne geophysical data and any environmental constraints.

- **Full e-Business facilities** to undertake all permitting transactions
- **Quicker permitting** and a more efficient service
- **Immediate availability to all publications** by the Exploration and Mining Division.

First phase now "live"

Click on the Exploration link at www.emd.ie

Giving you all that you need to assess ground and conduct your permitting business on the web
