

The MAPS Initiative

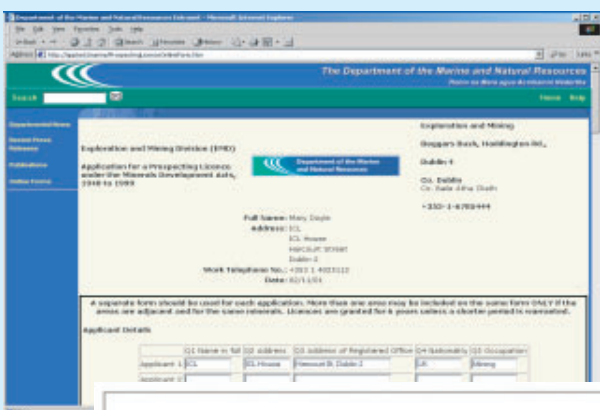

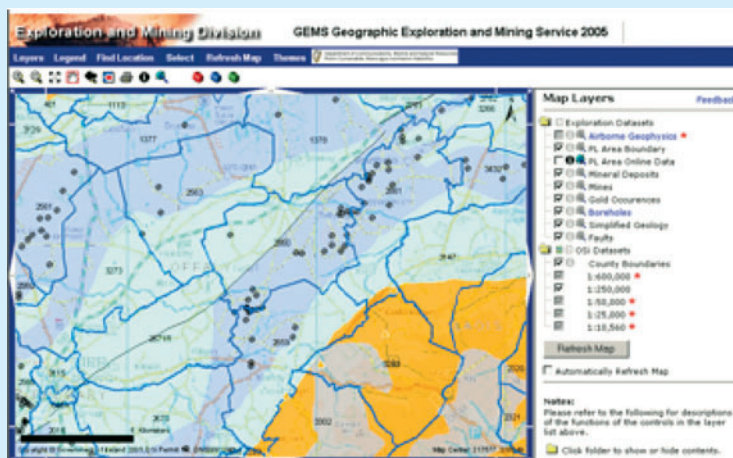

Your Exploration Gateway to Ireland

www.minex.ie

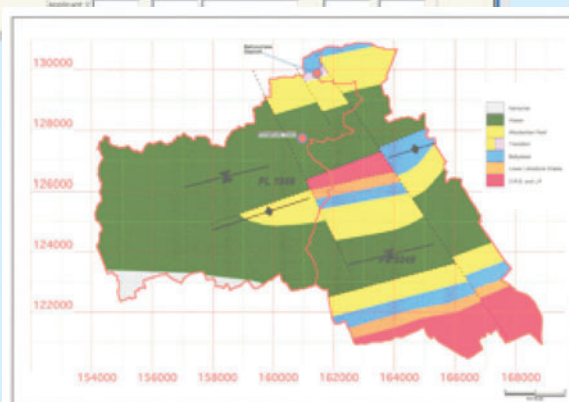

The Maps (Minerals Administration Programme Support) Initiative is a major e-Enabled project by the Government of Ireland to enhance data availability, ease of business transactions and the regulatory service to the minerals industry.

What you get

- Free access to all publicly available data sets held by the Exploration and Mining Division on the internet with GIS functionality. This includes the status of exploration ground, administrative history, exploration company reports, geological data, airborne geophysical data, mineral deposit and historic mine site information, and any environmental constraints.

- e-Business facilities to undertake exploration permitting transactions
- Quicker permitting and a more efficient service
- Immediate access to all publications of the Exploration and Mining Division.

Giving you all that you need to assess ground and conduct your permitting business on the web
